

Increase the shelf life of your cut flowers

Floritech™ Europe presents a flower display of excellent quality. A highly developed refrigeration system and humidity control ensures the best possible conditions for the flowers.

Floritech™ Flower Merchant 21

The Flower Merchant takes care of your cut flowers by ensuring a constant low temperature and a high humidity. The stylish display can be placed almost anywhere in your shop. The split-levelled shelves make certain that is bouquet is displayed uniquely, thus ensuring easy access and increase of sales.

Features

Simple design

- Many flowers in a small area
- Easy access
- The 4 wheels make it easy to move
- Modular (combines as island or row stands)

Technical

- Gentle and even airflow with high humidity
- Microprocessor controlled thermostat
- Microprocessor controlled defrost and evaporation of condensate
- Environmentally safe refrigerant (R404a)
- Low noise level
- CE Approved
